

PINE LILY CHAPTER  
FLORIDA NATIVE PLANT SOCIETY

# The Lily Pad

## January Meeting

We hope all of you had a wonderful holiday and welcome 2012! Pine Lily Chapter resumes regular meetings on Thursday, January 19<sup>th</sup> at 6:30 p.m. Tentatively scheduled is a team from the Saint John's River Water Management District, Regulatory Services Division, to bring us up to date on the Upper St. Johns River Basin Project. You can check our chapter page at [fnps.org](http://fnps.org) closer to the

meeting date to confirm this presentation or see what the alternate program will be.

As in the past, Pine Lily will continue to provide quality, educational programs promoting Florida native plants and conservation of their natural habitats at no charge to Osceola County residents and the general public. We hope you will visit with us often.

January 2012  
Volume 6, Issue 1

The purpose of the Florida Native Plant Society is to promote the preservation, conservation, and restoration of the native plants and native plant communities of Florida.

**Meeting is Thursday  
January 19<sup>th</sup> 6:30p.m.**

First United Methodist Church  
101 W. Dakin Avenue, Kissimmee

## Florida Arbor Day is January 20th

We're all familiar with National Arbor Day on the last Friday of April, but did you know that many states have their very own day set aside in addition to the national celebration?

Each state's Arbor Day celebration date initiates the signing of an Arbor Day proclamation by local officials and Arbor Day activities related to trees and tree planting. Celebrations are held as early as January and February in some southern states and as late as May in more northern locations. Twenty-eight states have the same date designation as National Arbor Day.

Florida has celebrated Arbor Day since 1886 and has one of the first Arbor Day celebrations in the nation, on the third Friday in January. So, circle January 20<sup>th</sup> and head to your favorite nursery to buy and plant a nice Florida native tree and join in the festivities.

In Osceola County, the City of St. Cloud is shown on the list of Florida's 'Tree City USA' Cities. Overall Florida has 160 cities with the TreeCity USA designation.

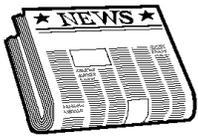

500 tree seedlings of various species will be given away by the Florida Department of Agriculture and Consumer Services Forest Service to help celebrate Florida Arbor Day. This year it takes place across the state in Hernando County at Tom Varn Park, 301 Darby Lane, Brooksville. For more information contact Justin Draft 352/754-6777, Ext. 108, [justin.draft@freshfromflorida.com](mailto:justin.draft@freshfromflorida.com)

**A great way to start the new year  
is with an annual  
Florida Native Plant Society  
membership.**

"Since we humans have the better brain, isn't it our responsibility to protect our fellow creatures from, oddly enough, ourselves?"

— Joy Adamson

# Pine Lily Members in the News

Pine Lily President Jenny Welch and member Bob Mindick were recently in the news with the opening of Camp Lonesome on December 17th. Camp Lonesome

was a purchase via the Environmental Lands Conservation Program, formally known as SAVE Osceola. It consists of nature trails for hiking or equestrian use. Bob is the Public Lands Director for Osceola County.

From the Osceola News Gazette:

“The property is described as a mosaic of mixed hardwood wetland swamps, wet prairies, cypress ponds and pine flatwood communities. Wildlife on the site consists of deer, turkey, wild hogs, gopher tortoises and a variety of bird species.

“I’ve also seen woodstorks, river otters, barn owls and tree swallows,” [Bob] Mindick said. “For folks who want to get away, it’s a great place to do nature study and eventually, we hope to be able to have it open for those who want to look at the stars.”

“Despite having foot surgery the day before the opening of the area, Jenny Welch, a member of the county's Land Conservation Advisory Board, came out to view the work.

“I wouldn’t have missed it,” she said. “Areas like Camp Lonesome are important not only for those of us here today but for future generations. If we don’t save the plants, birds, insects and animals now, they won’t be here tomorrow. We just don’t know what we are losing until it’s gone.”

For more of Bob Mindick's comments and to read the entire story visit <http://aroundosceola.com/>

Member Kim Duffy was quoted in City of Saint Cloud Press Release # 11-163:

## “St. Cloud’s Mt. Peace Cemetery makeover continues

Submitted by City of St. Cloud Public Information Office

St. Cloud, Fla. (December 29, 2011) – The City of St. Cloud was awarded an Urban and Community Forestry Grant from the Florida Department of Agriculture and Consumer Services, Division of Forestry, in 2010. The \$8360 matching grant was dedicated to the Mt. Peace Cemetery Makeover Project, a five-year plan that began in June 2010 and continues into the new year.

“The year 2011 was a ‘treerific’ year to play catch-up,” explained Landscape/Beautification Manager and International Society of Arboriculture-Certified Arborist Kimberly Duffy. “Our historical cemetery held a majority of trees that averaged 50 years old. We had few future generations until this grant provided financial support. However, our mission does not stop here. Each year, the Tree Advisory Committee (TAC) will plant trees to create a diverse, yet complete, canopied forest. These trees will continue to maintain land value and host a serene atmosphere.”

The Mt. Peace Cemetery Makeover Project is intended to restore and beautify the city’s historical cemetery. Twenty hazardous trees were removed, with a replacement ratio of more than 262 trees, all planted by the Parks and Recreation Department staff and TAC volunteers since receiving the award.

Mount Peace Cemetery is located at 755 E. 10th St. For more information on this project or details on any Parks and Recreation activity, project, program, or rental facility, please visit the Parks and Recreation at [www.stcloud.org](http://www.stcloud.org), e-mail [ParksAndRecreation@stcloud.org](mailto:ParksAndRecreation@stcloud.org), or call (407) 957-7243.”

If you know of any Pine Lily members who are making a difference, please email the details to [PineLilyFNPS@aol.com](mailto:PineLilyFNPS@aol.com)

# Hold onto those Balloons!

MyFWC.com For immediate release: December 9, 2011

## Holiday celebrations minus balloon releases best for Florida wildlife

As people gather together for occasions that make the holidays bright, remember that releasing balloons may be harmful to wildlife.

The Florida Fish and Wildlife Conservation Commission (FWC) wants event and meeting organizers and other Floridians to be aware of a **law prohibiting the release of more than nine lighter-than-air balloons within a 24-hour period.**

Instead of releasing balloons this holiday season, the FWC suggests groups use more environmentally friendly ways to celebrate events such as New Year's Eve and football bowl games.

The release into the atmosphere of large numbers of balloons inflated with lighter-than-air gases poses a danger and nuisance to the environment, particularly to wildlife and marine animals. Balloons released in Florida almost inevitably end up in the Gulf of Mexico, Atlantic Ocean or other water bodies. Wildlife, especially sea turtles, mistake balloons for food, and strings attached to balloons can entangle birds and other animals.

There are exceptions for balloons released indoors, scientific or meteorological balloons released by a government agency or under government contract, or hot air balloons recovered after launching.

## Species Spotlight

### DAHOOON (*Ilex cassine*)

Photo © 2011 Loret

Dahoon is a member of the holly family (*Aquifoliaceae*). This shrub or small tree reaches heights of approx. 26 feet. It has a pyramidal crown. Perfect for small yards; red berries on the female trees are a big hit with wildlife, especially overwintering songbirds; turkey and quail.

source: *University of Florida SFRC and IFAS*

Adaptable to most light conditions from full sun to deep shade.

Likes light sandy soil; has moderate drought tolerance but may require watering during extremely dry periods. As a native of boggy situations, it is a perfect choice for a low lying, wet area in your landscape. It has fair salt tolerance.

Propagate by seeds and cuttings with cuttings the preference to ensure a known sex of the plant.

USDA Zones 5-10.

## Upcoming

**February** - Beth Jackson  
Subject: Ecological Corridors and Land Management within Orange County (originally scheduled for 2011 Conference)

**March** - TBA

**April** - TBA

## Save the Date
